1	Туре А	Micro Bird GS Chevrolet 33 Passenger School Bus with convertible seats.	see Price	\$89,140.00 Lic	The air conditioning system on each Lion electric school bus is extremely powerful at 95000 BTU total. We use the ACT brand air conditioning system and it has proven to be an effective and reliable method to cool the interior passenger compartment. It maintains it a cool temperature for the last four years of our on-the-road electric school bus experience. We have our school buses deployed throughout North America including in areas where summer temperatures regularly get as high as 34 degrees C. Our electric school buses have proven to be able to reach and maintain a cool interior temperature even in these types of extreme heat. The time It takes to reduce interior temperature to 21 degrees C is minimal after system engagement. Our end users have even referred to our school buses as "ice boxes" in the summertime.		00 Type D	 Detroit DD8 7.7L 6 CYL 260 HP @2200 RPM 2600 Additional \$6, GOV RPM 720 LB/FT@1400 RPM 	,700.00	
2	Type C-Gas	Gasoline option - Ford 7.3L V8 with Roush	Additional	-\$5,470.00	We proudly say that our air conditioning system makes our electric school buses one of the most comfortable to ride in for end users and is a testament to our mission to manufacture high quality durable reliable dependable buses. Lion will happily provide additional information on the performance of our air conditioning systems upon request.		Type C	Detroit DD5 5.11.4 CYL 240 HP @2200 RPM 2600 No charge -\$	\$700.00

		School Districts may opt to be a Ford Warranty Centre through Dynamic Specialty Vehicles. This provides School Districts with a discount on all Ford parts for all Ford models and billable labour for any warranty work. This is applicable for Yellow School Buses and White Fleet and provides significant savings on parts and revenue on labour. Please contact Margarita Natavio at Dynamic for more details.
