

Maximize vehicle uptime.  
Minimize costs.

# Industry-leading EV fleet charge & energy management software

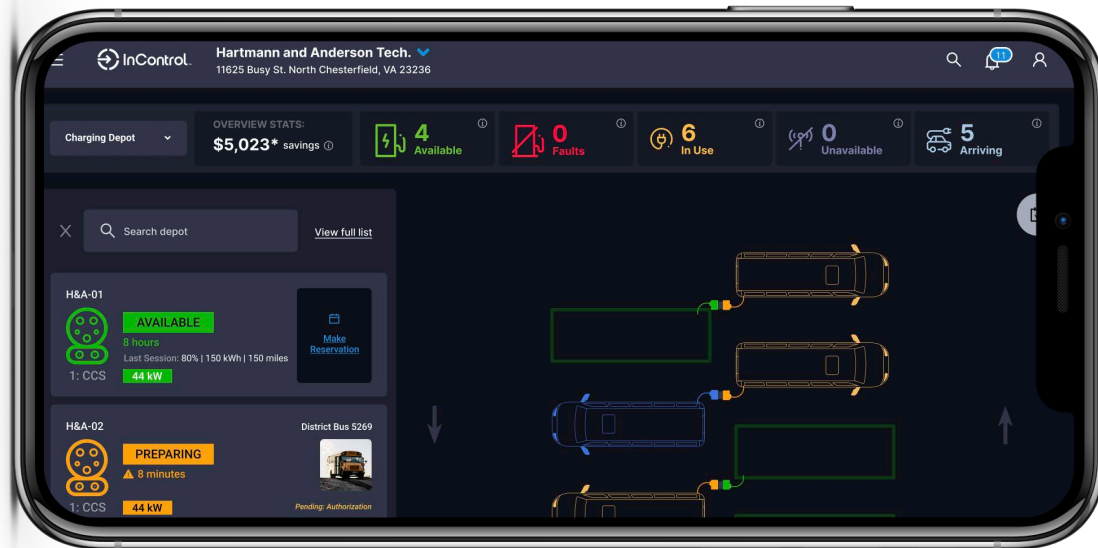

## How InControl works

**Simple**  
Intuitive user dashboards with customizable options

**Optimized**  
Realize cost-savings with load management

**Streamlined**  
Integrates with existing systems and more

**Easy fleet charge management**  
Real-time status and robust reporting for maximum vehicle uptime at minimal costs.

**InControl v4.0 coming this fall**

- New depot view
- Reservation system
- V2X integration

**Analyze energy usage**  
Track by any variable to measure ROI

**Seamlessly integrate vehicle telematics**  
Use your charging data to optimize fleet utilization

**Maximize fleet utilization**  
Utilize integrated data and reports to increase uptime

**Realize cost-savings with load management**  
Reduce operating expenses by controlling when charging occurs

**Increase efficiency**  
Generate reports and leverage learnings to shape overall strategy

**Stay InControl**  
Manage fleet charging from anywhere. Rest easy with real-time alerts
