

EV Charging Software

EV Charger Management

Manage your charging network and all of your EV charging stations from a single dashboard.

Rates Management

Set different charging rates such as fixed, variable, schedule, or a combination of all of them to control your charging rates.

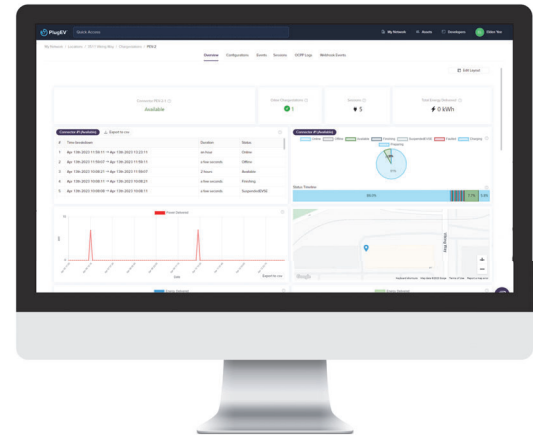

Basic User Management

Control who has access to your EV chargers and assign RFID cards to drivers for “tap & charge” capability.

Real-Time Session Data

View live active session details and energy usage data for full control of your charging sessions.

Other Key Features:

- Location management
- Real-time OCPP logs
- Usage reports
- Static power management
- Automated payment flow
- 6 month activation window

Upgradable Features

Dynamic Power Management

Optimize your charging infrastructure, reduce costs, and ensure grid reliability with intelligent power distribution.

Fleet Management

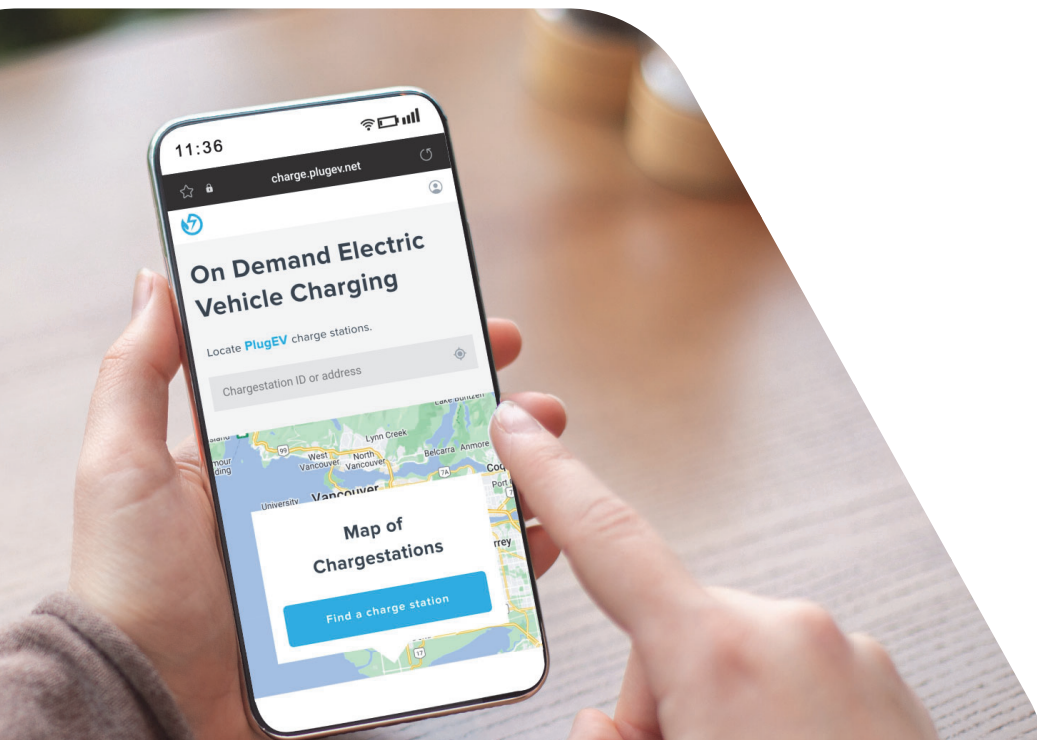

Take control of your electric fleet's charging needs with ease. Monitor energy usage and track charging costs effortlessly.

Advanced Access Control

Effortlessly set up and manage multiple users and organizations, including account details, access capabilities, and pricing policies.

PLUGEV DRIVER APP

Features:

- Start/stop charging sessions
- Automatic wallet top-ups
- Find nearby charging stations
- View charging history
- Charge without an account
- Bookmark charging stations
