1	Fleet and facility assessments	ChargeFWD provides Fleet and Facility assessment for yellow and white fleets.	Level 2 Charging Station	We can offer lower kW charging stations at a cheaper option. Would start off around 2168.12 (48A instead of 80A)	Partnership with AXSO	<p>Hypercharge has a strategic relationship with AXSO.</p> <p>Owned by Hydro-Quebec a world leader in clean energy AXSO helps station operators and charge point operators monetize the electric vehicle charging experience while keeping it as simple as possible for EV drivers.</p> <p>Currently AXSO are the charging platform for Hydro Quebec’s “Electric Circuit” which operates more than 4200 chargers including more than 700 Level 3 and more than 3400 Level 2 charge stations.</p> <p>In July 2022 Hypercharge and AXSO announced a major partnership to offer a comprehensive software solution to manage and optimize charging for Hypercharge’s users.</p>	Commissioning and Installation Services	Siemens has the capability to provide installation and commissioning services to ASTSBC members. To give an accurate quote for these services Siemens will require further details on scope site and quantities of the order.	Level 3 Chargers availability	Please note that The Lion Electric Company has ABB chargers in stock with a delivery timetable of 1 week after Purchase Order.
2	Level 2 Charging Station	ChargeFWD has a full offering of level 2 stations ranging from 32A - 80A output	Charging Whip	Charger prices include whip. Will be cheaper if no whip is needed.						
3	Commissioning and Installation Services	ChargeFWD provides Commissioning and installation services for EV Ready electrical modifications and charging infrastructure.	Installation	Electrum can also do site visits to best advise customer on where chargers could be installed. We also have an installation team that can install the chargers, allowing Electrum to be there from start to finish. Pricing would be based off a per project scenario. Please contact us to discuss.
