

THE LEADING ENTERPRISE PLATFORM FOR EV FLEETS

Synop™, the leading enterprise platform for EV fleets, is accelerating the transition to commercial electric vehicles by seamlessly connecting vehicles, chargers, and the grid through end-to-end software solutions that optimize EV charging and energy management. Using AI-based platform automation, telematics integrations, and real-time monitoring tools, Synop offers a vendor-agnostic software suite to maximize fleet uptime, minimize charging costs, and generate revenue through smart grid participation.

PLATFORM AUTOMATION

Maximize fleet uptime and minimize charging costs.

INTEROPERABILITY

Any vehicle. Any charger.
Any utility.

AI OPTIMIZATIONS

Get the most out of your EV fleet.

EVERYTHING UNDER ONE ROOF

Software that connects EV fleets, chargers, and the grid

Charging management

Monitor, schedule, and optimize your fleet charging

Energy management

Boost your profit and performance with advanced energy management

Vehicle management

Monitor and manage your electric vehicles

Payment management

Launch a robust payment and billing program

Use cases

Synop's cutting-edge solutions cater to a wide range of sectors and industries. Synop sells its software directly to commercial EV fleets, as well as through channel partners, including auto OEMs, infrastructure providers, and utilities. The software may be purchased off the shelf, white labeled, or integrated into an existing platform.

Commercial EV fleets

Supplying charging and energy management capabilities for EV fleets, operating **medium & heavy duty** electric school buses, drayage trucks, last mile delivery, **light duty** corporate lease and car-sharing fleets covering take-home and workplace charging needs.

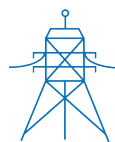

Auto OEMs

White label EV fleet and charging management solutions for auto OEMs to provide to end fleet customers who are electrifying their fleets.

Infrastructure providers

Delivering energy cost management in fleet depots, commercial, and municipal EV fleets through dynamic load and energy management capabilities.

Utilities

Providing energy management insights, AI-driven forecasting tools, and vehicle-to-grid (V2G) management to ensure seamless and efficient grid management and activities.

Supporting the future

Synop is a proud supporter of industry organizations and standards focused on changing the transportation landscape, advocating open interoperability, and educating the public and private sectors on the benefits of vehicle electrification.
